During the trip, the guide introduces all relevant heritage and museum articles. During the visit, local ethnic people also cooperated with us and introduced us to their food habits, dress, traditional culture, etc. Students take photographs, purchase books, and note down all visited heritage site experiences. By evening, 12 January, we started our return journey from Sivasagar to our college. The next day, 13 January, in the evening, we reach our college.

#### **Feedback:**

Field trip is a regular practice of our department. Each year we plan for a local trip and a trip to other districts and states. Participant students express their lovely, unique feelings for the trip. They inform that outside the classroom, such a trip is an urgent need to study the history of Assam.

DETAILS DESCRIPTION OF THE PROGRAMME :-

The industrial visits play a very pivotal part in a student's life. The students attain a greater learning resource as well as curve when visiting companies than referring to mere textbooks. All the practical exposure aside, students find industrial visits a bliss for all the fun that happens in between! The travel to and from is what adds up to make the best memories of a student's life.

Planning the entire programme schedule well in advance is by far the most crucial part of organizing an industrial visit. The team has got to plan the timings and activities that are to be carried out during the course of the visit. In doing so the students can make the most of their time and even consider doing something fun if they get done a little early. Creating a day's blueprint can always help one navigate through the day without confusion and with clarity.
